## II. Organizational Context and Purpose of the Job

The fundamental mission of UNICEF is to promote the rights of every child, everywhere, in everything the organization does — in programmes, in advocacy and in operations. The equity strategy, emphasizing the most disadvantaged and excluded children and families, translates this commitment to children's rights into action. For UNICEF, equity means that all children have an opportunity to survive, develop and reach their full potential, without discrimination, bias or favoritism. To the degree that any child has an unequal chance in life — in its social, political, economic, civic and cultural dimensions — her or his rights are violated. There is growing evidence that investing in the health, education and protection of a society's most disadvantaged citizens — addressing inequity — not only will give all children the opportunity to fulfill their potential but also will lead to sustained growth and stability of countries. This is why the focus on equity is so vital. It accelerates progress towards realizing the human rights of all children, which is the universal mandate of UNICEF, as outlined by the Convention on the Rights of the Child, while also supporting the equitable development of nations.

**Job Organizational Context:** The Supply and Logistics Officer reports to the Supply and Logistics Manager/Specialist as per the Country Office set-up for supervision and guidance. The Supply and Logistics Officer provides technical and operational support as per the Country Office (CO) set-up and is responsible for managing the supply chains of a small-sized country office, or elements of the supply chains of a larger supply operation. The supply chain operations include planning, procurement, contracting, customs clearance, warehousing, in country transport and distribution, as well as monitoring of supplies, services and construction works. The incumbent supports management collaboration with programmes in defining supply interventions to meet programmatic needs and achieve results for children; and provides technical and advisory support to governments, national systems and partners on supply chain management.
