<b>II. Organizational Context and Purpose for the job</b>
<p>The fundamental mission of UNICEF is to promote the rights of every child, everywhere, in everything the organization does — in programs, in advocacy and in operations. The equity strategy, emphasizing the most disadvantaged and excluded children and families, translates this commitment to children’s rights into action. For UNICEF, equity means that all children have an opportunity to survive, develop and reach their full potential, without discrimination, bias or favoritism. To the degree that any child has an unequal chance in life — in its social, political, economic, civic and cultural dimensions — her or his rights are violated. There is growing evidence that investing in the health, education and protection of a society’s most disadvantaged citizens — addressing inequity — not only will give all children the opportunity to fulfill their potential but also will lead to sustained growth and stability of countries. This is why the focus on equity is so vital. It accelerates progress towards realizing the human rights of all children, which is the universal mandate of UNICEF, as outlined by the Convention on the Rights of the Child, while also supporting the equitable development of nations.</p> <p><b><u>Job organizational context:</u></b> The Security Officer GJP is to be used in a Country Office (CO) and reports to the <b>Security Manager</b>.</p> <p><b><u>Purpose for the job:</u></b> The Security Officer reports <b>to the Security Manager</b> for close guidance and supervision. The Level 1 is an entry professional level and should therefore be normally used as a trainee level for the purpose of acquiring organizational knowledge of rules, regulations and processes to supplement academic and theoretical knowledge of the profession for upward mobility to higher responsibilities. Incumbents at this level are not expected to remain for an extended period of time in the post.</p>

The Security Officer provides technical, operational and administrative assistance in security management and services through the application of theoretical and technical skills in researching, collecting, analyzing and presenting technical security related information/data while learning organizational/UN system rules, regulations and procedures in the area of security management and emergency/crisis preparedness.
