I. Background

Liberia has made significant strides in improving access to education, particularly in early childhood and primary education. The country has set a goal to ensure that all girls and boys have access to quality early childhood development, care, and pre-primary education by 2030. However, the quality of education remains a challenge. While Liberia has made progress in improving access to education, there is still much work to be done to ensure that all children have access to quality education and that they complete primary education. According to a report by the United Nations, only 54% of children complete primary education in Liberia. Liberia is among countries with one of the highest levels of out-of-school children, with an estimated 15-20% of 6-14 year-olds not in class. According to the World Bank, at least two-thirds of ten-year-olds are able to read a ten-word sentence. Additionally, approximately 40% of primary school students are three years older than the appropriate age for their grade. Only 13% are ready for school in early learning interventions.

Foundational learning including Early childhood learning (ECE) through to grade three in lower primary is a particularly critical stage in a child’s development as it lays the foundations for lifelong learning. It is a stage when children are provided the foundational skills, knowledge, and attitudes to learn and succeed in school and beyond. Foundational learning including ECE is a key component of the Sustainable Development Goals (SDGs) and the Education 2030 Agenda, which aim to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. The attainment of this goal is now much more urgent due to the COVID-19 pandemic which exacerbated learning loss from the previous decades. The government of Liberia together with other African countries have signed commitments to foundational learning.

UNICEF, LCO’s in collaboration with the Ministry of Education has taken several steps to ensure the attainment of the above government commitment. Education partners have consequently developed a Partnership Compact with key support from the Global Partnership on Education that prioritizes the implementation of Foundational Learning and in particular, the attainment of literacy and numeracy by grade three. Within this framework, UNICEF LCO promotes ECE through the first grades of primary education. UNICEF specifically strengthens schools systems to improve access and teacher education to improve learning outcomes at the foundation stages. In that regard, UNICEF, LCO’s Education Section is seeking to provide technical support to respective schools and teacher training institutions to strengthen foundational learning including ECE through the early stages of primary.

II. Purpose of Activity/Assignment

The purpose of this consultancy is to support the Ministry of Education and three Teacher Training Colleges (TTIs) in particular to implement Foundational Learning including ECE through early primary grades. In that regard, reference is made to improvement in school readiness as well as the attainment of sector goals in literacy and numeracy by grade three. The consultancy will support TTIs to among other things review, adapt and adopt relevant teaching and learning materials, improve teacher training programmes in formal and non-formal settings,
support operational research, especially on formative assessment, and facilitate three TTIs to roll out of foundational learning within the CPD policy framework.

III. Scope of Work:

1. Review and adapt the existing teaching /learning materials, tools and guidelines for Foundational Learning including literacy and numeracy in ECE through to grade three.
2. Provide technical support to the training programme development as well as conduct of ToTs (for TTI Lecturers) across the three teacher training colleges aimed at enhancing the capacity of teachers for Foundational Learning.
3. Provide technical support to the three TTI plans for the roll-out of in-service teacher training programmes and implementation of Foundational Learning in 200 schools within 60 school support clusters.
4. Provide technical support to the conduct of documentation and operational research to generate evidence on Foundational Learning including assessment of school readiness, and the attainment of literacy and numeracy outcomes at ECE and primary.
5. Support the development of a monitoring and evaluation plan and reporting on Foundational Learning including ECE and Primary in compliance with agreed schedules of Government and partners.
