Summary of key functions/accountabilities:

1. **Programme support for T4D and digital interventions**
   - Monitor progress and provide quality assurance during planning and deployment of T4D initiatives in ICO; and participate in establishing and maintaining standards, documentation, and support mechanisms for T4D.
   - Support the Sudan Country Office with the scale-up of T4D and digital interventions which employ UNICEF innovation tools including but not limited to RapidPro, U-Report, ONA Data, and PRIMERO.

2. **Strategic Partnerships for Digital Innovation for children**
   - Research, identify and engage with potential regional and country specific T4D partners and explore areas of engagement to promote and enhance UNICEF goals in the area of Technology for Development.
   - Participate in and facilitate the establishment of strategic long-term engagements (LTAs, PCAs, MoUs) with strategic partners.
   - Help maintain partnerships with government counterparts and national stakeholders through active sharing and transfer of knowledge, skills and tools to foster and facilitate technology-enabled programming.
   - Help identify opportunities for resource mobilisation and new partnerships and assist proposal and partnership development efforts.

3. **Knowledge Management, Research and Analysis**
   - Help identify, capture, synthesize and share lessons learned from T4D for integration into broader knowledge development planning, advocacy, and communication efforts.
   - Maintain an inventory of Technology and Innovation interventions, assets, resources, and networks.
   - Support documentation and clear monitoring and evaluation mechanisms for innovation and T4D projects including baseline data collection, on-going monitoring, as well as first phase data collection and analysis.
   - Promote the use of collaboration tools for knowledge management, capacity building and preserving institutional memory.
   - Contribute to and share regional and global digital development and technology innovation networks and activities.

4. **Technical Assistance for capacity development**
   - Work directly with programme teams and partners to adapt technology and innovative solutions appropriate to the country programme, based on good practices globally and in country.
   - Collaborate with the ICT team in the country office, RO, ICTD, and Global Innovations on potential strategies for scale-up and in country support.
   - Assist country office to identify and assess new T4D initiatives, or new phases of on-going initiatives, with immediate potential to improve UNICEF programming.
   - Participate as resource person in capacity building initiatives to enhance the competencies, capacity and knowledge within the programmes on digital development, train UNICEF staff,

partners, government counterparts and other end users in digital development and technology innovation for children.

5. T4D Focal Point

Along with ICT/T4D focal point(s), act as focal point for all ICO T4D related matters
