Legend: technical outputs partnership outputs technical outcomes partnership outcome impact assumptions Arrows indicate contribution to the result indicated; external factors and assumptions affect the extent of the contribution.

By 2030 All refugee children enjoy an equitable chance in life: IMPACT they are learning, living in clean and safe environments, protected from violence and exploitation, included in national systems and supported by an effective and efficient UN system ♠ ♠ $\mathbf{\Lambda}$ Outcomes will contribute to impact if: • Governments, development financers and other stakeholders live up to their stated CRC, SDG and GRF commitments • There is sufficient global economic and political stability to allow steady progress towards SDGs Humanitarian space and principles are respected in humanitarian contexts • Progress is achieved in other key SDG areas including access to decent work • Growth rate of refugee caseload does not increase Education WASH **Child Protection and Gender Based Violence** Enhanced partnership will con-By 2021, increasing numbers of refugee and re-By 2021, all refugee children and the communi-By 2021, refugee children will have improved **MEDIUM**tribute to the access to birth registration and child protecturnee girls and boys have access to free, equitable ties that host them have access to safe and TERM achievement of and quality primary and secondary education leadclean drinking water, and adequate sanitation, tion services; and refugees affected by, or at OUTCOMES all programmatic ing to relevant and effective learning outcomes with roadmaps in place for their inclusion in narisk of, gender-based violence will be sup-← IN 10 outcomes while increasing numbers of refugee youth have tional systems. ported with safe, appropriate survivor-cen-**COUNTRIES** equal access to affordable and quality technical, votred programmes. cational and tertiary education, including university. $\mathbf{\Lambda}$

Outputs will contribute to the achievement of outcomes if:

- National budgets, development finance and / or humanitarian funding is sufficient to support services of adequate quality
- Social cohesion is sufficient to allow for refugee inclusion
- There is demand for services in the refugee population (e.g. those at risk / in need take advantage of improved access)
- There is sufficient data to identify and address gaps
- Refugee hosting governments are supportive of inclusion and live up to GRF pledges

crosscutting output: by 2021, National laws, policies, plans, budgets and data systems are increasingly inclusive of refugee and returnee communities in 10 countries
