

TERMS OF REFERENCE FOR LOCAL CONSULTANCY

Team Leader for a Feasibility Analysis of the National School Management and Governance Approaches

Individual Consultant is expected to perform this assignment remotely (home based) with possible field missions as required.

Duty Station: Yerevan, Armenia

Supervisor: Education Specialist, Education Officer (GPE)

Time-frame: from early May to end of July (approx. 3 months)

Purpose of Activity/Assignment:

The aim of the assignment is to support improvement of Armenia's national school leadership system through comprehensive system analysis and policy recommendations. Under this assignment, the assignee will be working with a team of dedicated experts, composed of two Junior and two part-time Junior Experts. The assignee will be responsible for all the components of the analysis, which envisage both secondary review of existing data, desk-research and primary data collection/analysis.

These activities will contribute to the SDG (Sustainable Development Goal) Target 4.1. which requires states to "that all girls and boys complete free, equitable and quality primary and secondary education leading to relevant and effective learning outcomes." At the global level, the agenda around the SDG 4 to 'ensure inclusive and equitable quality education and promote lifelong learning opportunities for all' by 2030, has reinforced a focus on learning assessment to gain data on learning that allow to establish and monitor education quality and learning progress.

A feasibility analysis of National School Management and Governance approaches and stakeholder inclinations towards these approaches shall be implemented to identify academic-literature-driven, optimal (efficient and effective) and context-responsive policies which foster school autonomy and accountability. The specific objectives under this assignment include:

1. A secondary analysis of existing research and policy documentation shall be implemented to map the issues and improvement recommendations connected to the existing National School Management and Governance approaches;
2. Cross-case analysis of existing in the country private schools', participative schools' and other governance models to identify alternative approaches;
3. Critical review of advanced international theory and practice to identify optimal school governance approaches and policies for feasibility analysis in the local context.

Key stakeholders of the assignment are the government line ministries, namely the Ministries of Territorial Administration and Infrastructure (MoTAI), MESCS, sub-national and local authorities, UNICEF, EU and dedicated CSOs.

The knowledge generated by the study should be used by UNICEF Armenia to inform and amplify its future activities and projects in the country and will also be used by other national stakeholders to further refine the quality, cohesiveness and timeliness of policies in the field of general education.

Scope of Work:

Context

Improved school leadership is foundational in achieving the target 4 of the Education 2030 Agenda via building safe, non-violent, inclusive, and equitable learning environments; propelling the schools towards equitable and quality education for all; eliminating gender disparities and allowing equal access to education for all vulnerable populations. International research indicates that school leadership (both on top and middle level) has strong impact on student learning outcomes. School leadership systems can be broadly defined as sets of policies, practices and structures that define how school leadership is formed, what role it plays, how school leaders are initially and continuously educated, recruited, evaluated, how the broader system governance interacts with individual school leadership.

School leadership reform in Armenia started in 1997 via the World Bank (WB) Education Financing and Management Reform Project (EFMR). The reforms focused on restructuring and decentralizing the education management system, introducing per capita funding (replacing the existing per-class system) and policies to provide schools with more autonomy and agency. By 2005, all schools had their budgets based on per pupil funding. Training of school principals and board members in school financial-economic issues, management and leadership started under the WB EFMR project and continued under the Education Quality and Relevance (EQR) project. Trainings included additional modules in accordance with the main directions of reforms including the following topics: new subject standards and syllabi; new assessment principles; and new student-centered teaching methods and introduction of ICT. The second phase of EQR also included training of principals in designing and implementing school development plans. In line with these reforms Armenia introduced policies and regulations, primarily via the Law on General Education, decrees by the Government and the Ministry, on forming of school boards, election, training, and attestation of principals.

In 2021 the Government approved Armenia's new National Curriculum, to implement the provisions of which in full, the Ministry of Education, Science, Culture and Sport (MESCS) joint with the newly established National Center for Educational Development and Innovation (NCEDI) intends to review school leadership system in Armenia.

Currently, the Government is piloting in Syunik region a new approach to school governance, which this study should also closely examine, among other issues within the frequently changing environment.

Responsibilities in the Team

The Team Leader will be responsible for developing, planning and leading the work of technical working group for the assignment, with full set of reporting documents adhering to UNICEF quality assurance standards being developed and submitted in a timely manner. The Consultant will be ensuring in-depth cooperation and communication with various stakeholders, particularly, members of the Local Education Group, focal points at MoESCS, National Center of Educational Technologies (NCET), NCEDI, other agencies, as deemed necessary. The technical working group will be composed of two Junior and two part-time Junior Experts to be supervised by the Team Leader. UNICEF will organize thematic orientation sessions and consultations.

UNICEF will organize thematic orientation sessions and consultations. This assignment is within the Global Partnership for Education (GPE) Education Sector Development Programme Grant-a joint UNICEF and the MoESCS Sports initiative to be implemented during 2021-2022.

This assignment is within the Global Partnership for Education (GPE) Education Sector Development Programme Grant-a joint UNICEF and the Ministry of Education, Science, Culture and Sports initiative to be implemented during 2021-2022.

Methodology

The study methodology shall be primarily based on qualitative research methodology. The qualitative data should be collected through remote key expert and key informant interviews (KEI, KII) and focus group discussions (FGDs) with the main target groups. Details of sampling approach, sample sizes and recruitment of participants were developed by the study team and are presented in the Study Protocol which is pending final approval by UNICEF Ethics Review Board (ERB).

In addition to this, the study should heavily rely on the analysis of secondary data, including existing research and policy documentation, as well as cross-case analysis of governance practices of school institutions in order to identify gaps within the system and propose targeted and both theory-driven and empirically proven solutions to each of these challenges.

The final reports should incorporate the main learnings from all stages and provide concrete and accurate policy solutions for the MESCS to pursue. More information on the technical requirements for each report will be provided to successful candidates.

Ethical Considerations

The assessment approach and data collection and analysis methods should focus on gender and human rights aspects, be responsive and appropriate for analyzing the gender equality, human rights issues, including child rights issues. Gender equality, equity and human rights considerations will be further elaborated by the Consultant and the Team during the inception phase and addressed across the final reports. Ethical dimensions should be taken into consideration by the Team, discussed and measures taken to ensure those. More specifically, prior to conducting interviews the respondents' informed consent should be ensured, age-appropriate language and approaches to data collection involving children should be used. The anonymity and confidentiality of individual data will be protected, and ethical guidelines will be followed as set out by United Nations (UN) Evaluation Group in its standards and norms. Adherence to the UNICEF Procedure for Ethical Standards in Research, Evaluation, Data Collection and Analysis¹, Strategic Guidance Note on Institutionalizing Ethical Practice for UNICEF Research² and Technical note on Children Participating in Research, Monitoring and Evaluation³ should be ensured by the team.
