| Work Assignment Expected Results | | | | | |
|---|--|--|---|--|--|
| Tasks/Milestone: | Deliverables/Outputs: | Timeline | Estimate Budget | | |
| Establish a Lebanon specific project plan and schedule for the full cold chain assessment and rehabilitation planning exercise across the country; Outline the approach to the assessment and advise on an appropriate data collection tool; Support to identify and engage key stakeholders and mobilize the project team; | A work-plan outlining the specific activities to be conducted with objectives and timelines; including key stakeholders to be involvedat each activity Monthly / bi-weekly update report outlining country specific timelines, status of implementation, anticipated challenges, risks, and proposed way forward; | To be agreed with the consultant before the start of the contract. | Breakdown of the budget to be agreed with the consultant before the start of the contract. | | |
| 2. Provide technical assistance to tailor the selected cold chain inventory assessment tool to the Lebanon context with clear parameters/data points for data collection; | 2- Tailored cold chain inventory tool for Lebanon's context | | | | |
| 3. Oversee the data collection exercise and work with the project team to resolve any issues that may arise during the process; Establish a cold chain inventory database and analyze the key findings on status of the cold chain equipment in Lebanon; | 3. Cold chain inventory database and a summary of key messages on the cold chain status; | | | | |
| 4. Develop a cold chain replacement and rehabilitation plan and provide technical advice including specifications for recommended cold chain equipment; and mapping of key stakeholders | 4. Cold chain replacement and rehabilitation plan, including recommended cold chain equipment; Country specific end-to-end cold chain optimization detailed process map involving international | | | | |
