

## Consultant – School-based Immunization and Health Programs in the East Asia, South East Asia and Pacific Region.

### Work Schedule:

Date	Output Expected
1 June 2022	Assumed start date
22 July 2022	Submit a data collection tool and plan for the landscape analysis
30 September 2022	Submit a landscape analysis in a table of key initiatives, findings, and tools used for school-based health and immunization programs in the region.
21 October 2022	Submit a summary PPT of landscape analysis of school-based health and immunization programs, identifying gaps and opportunities, highlighting best practices and lessons learned.
30 November 2023	Submit a narrative regional agenda with recommendations for school-based immunization and health activities in EAP. Update summary PPT to include key recommendations from the narrative agenda.
31 January 2023	Taking into consideration feedback from region and country level colleagues, submit final landscape analysis summary table, regional agenda with recommendations, and summary PPT presentation; present final findings to regional and country office health and education staff.
1 February 2023 - 16 May 2023	Ongoing virtual and in-country support to country offices interested in implementing, expanding or evaluating school-based health and immunization programs; submit an end of year summary report of technical assistance and instructions for key next steps.
